MEASURABLE OBJECTIVE(S)

\*This is to be used at project completion to measure its impact and success How can you MEASURE the problem / issue? To EVALUATE your project (once it has been implemented) it is useful to compare and contrast INDICATORS taken before and after the project is done Try and use simple indicators which are easily measured.

Examples:

- A Tree Planting Project:

(1) Indicator = Number of Trees in a certain area BEFORE the project  
= Number of Trees in a certain area AFTER the project

(2) Indicator = Results of simple questionnaire BEFORE the project  
= Results of simple questionnaire AFTER the project

PHOTOS:

\*We need the photos of young people doing the work and of the site and/or people to be affected by the project ("before" photos) and your photo as well. If you have trouble obtaining a camera or paying for processing, please tell us your reasons. We may provide disposable cameras when necessary. You can paste the photos below or send them with this proposal.

MENTOR OF THE PROJECT

\*Each project should have an experienced adult who agrees to volunteer their time to support and monitor the execution of the project. A mentor should not be connected to your family or group. We recommend that you should choose someone who has knowledge in the field that your proposal is related to. He/she may be asked questions if we have further enquiries concerning your project.
